**Anson Experts to Lecture at Sessions for Purdue Regulatory Course**

(INDIANAPOLIS, IN) March 1, 2011 Anson Group pharmaceutical consultants, Michael Langley, DVM, MBA, RAC, and John Worzalla, M.S., RAC, will be presenting at weekend sessions for the course, "Drug Development," part of the Regulatory and Quality Compliance Graduate Certification program in the Purdue University College of Pharmacy. These sessions will take place on March 13 and April 17 at the University Center of Lake County in Grayslake, Illinois.

Dr. Langley will present a lecture entitled, "Animal Drug Products: Discovery, Development, & Registration... Special Considerations," on March 13, and Mr. Worzalla will present two lectures on April 17 entitled, "Regulatory Affairs: Who's Who and What Do They Do?" and "Submitting an NDA: The Dream and the Reality."

The Purdue Regulatory and Quality Compliance Graduate Certification program provides graduate level education in the organization and operation of the regulatory and quality compliance fields. Individuals successfully completing the certificate program have the option to apply the credit hours earned to the Purdue Regulatory and Quality Compliance Master's Program. Regulatory professionals presenting in the program include experts in their fields, with typical representation from FDA and academia, as well as experienced consultants and industry professionals.

**About Anson Group**

Headquartered in Carmel Indiana, Anson Group is a minority-owned independent consulting organization with over 14 years experience as a leading provider of services and strategies for FDA product approval and compliance for devices, drugs, biologics, and combination products. Anson Group's team of experienced industry experts tailors both enterprise strategies and clearly-defined action plans that help its clients address crucial issues throughout the product life cycle. Anson works with clients in the United States, Europe, and Asia, from global pharmaceutical manufacturers to small pre-IPO or VC biotechnology and medical device start-ups.
